## My Wife Has Died - The Music

Global trade in “designer” skins is becoming increasingly sophisticated and can be split into two categories: “factory”, which include large factories that produce authentic skins, and non-authentic skins, which are crafted either by a small team of people based in a one-bedroom flat, or in factories that produce a huge number of skins a day (Image: Getty) Professor Clive Royle, of the University of Newcastle, told The Drum that “A chrome (or vacuum) layer, again much like a hologram, is applied either by spraying or brushing on powder particles of chromium oxide or similar material.<sup>5</sup> More colours, including the more expensive shades of flesh, such as the rare pink and purple hues, are now available in OEM packs as standard.
